

Saboteur

KURT ERICHSEN

BEING GAY BUT ASSUMED STRAIGHT CAN BE LIKE BEING A SPY....

Hear the one about the two queers and the donkey?

Roger Barklay is an agent of LAMBDA, the gay espionage organization. At headquarters he receives an undercover assignment:

We have an infiltration job for you. Here are your papers. We've got you hired at Straightways Industries.

Straightways? They'd lynch any gay they could get their claws on!

Ah, I see you've heard of them.

We've got wind of some anti-gay scheme. They're hatching. Your job is to sabotage it.

You'll need a disguise.

But this is a mask of my own face.

Best disguise there is, kid.

Good luck.

Roger reports for work at Straightways.

What security! You'd think they were getting ready for war.

Hmm... Maybe they are!

I'm a new employee. Here are my papers.

Come this way.

This is Murphy, your boss.

Hi, I'm Roger, the new night security man.

Not so fast.

We only want the right sort of *man* working here. Catch my drift?

We give new employees a test.

Shortly...

So they're asking questions they think only faggots can answer, eh? Well, I'll give 'em straight answers!

16. Where are the prostate glands located?

In the elbow.

127. What is a lambda?

a baby sheep.

After Roger finishes the written portion...

There's one more section to the test.

How LYING A FAIR

We want to make sure you don't have a limp wrist.

ACME LIMPOMETER

STUPID STRAIGHT FAGGOT

Hmm... all right. You pass.

C'mon. I'll show you to your assignment.

We're concerned about Americans' attitude toward homosexual "rights" ...

So we're making a chemical modification to a widely used product.

MEN

They're drugging TV dinners! Who'd have thought it?

2

When a homo eats the drug, his body chemistry reacts to it...

...and he turns fluorescent purple.

We'll make them queers glow in the dark.

They'll be easy targets then!

For six months Roger does his job as directed. Before he can do any successful spying, he must gain Murphy's trust.

He avoids TV dinners.

One night he sneaks a sample of the drug...

...and secretly relays it back to headquarters.

Two days later, Roger gets a surprise on his coffee break.

A vial in my tharmos. And a coded message.

Um. It says this chemical will slightly change the effect of the stuff added to the TV dinners. I have to mix this into Straightways' brew.

I know a duct in a pipe in an obscure corner, where they'll never find the vial.

...near the ceiling.

There! The chemical will be fed into their mixture a little at a time.

With his mission completed, Roger returns to headquarters.

After a few days, the tampered chemical takes effect.
